

Italian Cypress

cupressus sempervirens

15g Italian Cypress

Italian Cypress is an evergreen conifer that is native to Southern Europe and western Asia. It has a narrow columnar habit of growth and forms tall, dark green columns 15 to 50 feet in height.

Extremely unique because of its very special form, Italian Cypress is an excellent choice for a strong accent around large buildings, in groupings of three to five, planted three feet apart as a tall screen or used to frame your landscape. Whatever the application, Italian Cypress will provide classic distinction in landscape beauty. It is a favorite of all Mediterranean-themed landscapes.

The Italian Cypress is a great choice when it is desired to draw attention to a formal area. With its fine textured genuine rich green foliage, narrow columnar habit and tall mature height, Italian Cypress excels beyond other choices.
